

APPLUS+ VENTURES: CHALLENGE REQUEST

Applus+ **Division Name**

Date:

Owner(s):

CHALLENGE HEADLINE

Use a short sentence, easy to remember, descriptive of the problem to solve

1.- PROBLEM

Explain briefly relevant background information, detailing the problem we are trying to solve and why

- Background
- Problem
- Expected impact and benefits of solving the problem (*cost savings, efficiency, new revenue streams, customer experience, etc.*). Include business case or indicative figures of this benefits if available
- Would other business units benefit of the solution of this problem? Would other business units be interested in the solution for other purposes?

2.- POTENTIAL SOLUTION/S

On your best knowledge, describe possible solutions and/or technologies that you estimate could solve the problem. Include names of known companies and startups that may have a solutions and/or you have been in contact in the past

- Possible solutions/technologies. Company names (if known)
- Functional description of the potential solution
- Technical specificities (if known)

3.- DISCARDED SOLUTIONS

Indicate which solutions you think are not viable and why. Indicate the name of companies owning the solution if possible. Indicate main

- Non-viable solutions. Company name (if known)

- Why?

4.- NUMBER OF STARTUPS

Indicate the number of potential startups expected to review. The first deliverable will be a list of startups potentially qualified to solve the Challenge, based on public information (Long List). The team will review and select a few, to be contacted by Applus Ventures to request further information and confirm their qualification and interest in meeting Applus (Short List).

- Expected number of startups in the Long List: 20
- Expected number of Startups in the Short List: 3 to 5

4.- CONSIDERATIONS

Are there a time, cost, resources or technology constraints to consider for this project? What is the level of urgency or deadlines? What are the main barriers or stoppers to consider? (availability of the team, engagement of the end users, etc.)?

- [...]

5.- PILOT PROJECT/PROOF OF CONCEPT

The Pilot Project or Proof of Concept is a project of limited scope and timing to qualify the selected startup and its solution. Please confirm the interest in such project and detail preliminary particulars, if known. If the objective of this challenge is to obtain a list of startups only, indicate so, together with the number of expected Startups.

- Scope/Use Case (specific functionalities, data sets, in a certain geography, department, etc.):
- Technical or other relevant particulars to consider:
- People Involved (name and position):
- Potential Start date:
- Estimate duration:

- Budget (in case we estimate the startup will incur in costs, indicate if you are willing to pay for the Pilot Project/Proof of Concept):

6.- VALUE PROPOSITION/POST-PILOT COLLABORATION

What are the benefits that the startup may get if it accepts to collaborate with Applus, if the Pilot Project/Proof of Concept is successful. Please elaborate

Commercial Collaboration in the short term
Access to Applus clients or markets
Long term Partnership
Collaboration in a joint R&D project
Financing

7.- APPLUS TEAM

Indicate the people involved, name and position

- Sponsor
- Owner (main contact person)
- Coordinator (support to the Owner, if applicable)
- Evaluators (people involved in reviewing Long List and Short List)
- Pilot Project/Proof of Concept Team

11.- DOCUMENTATION

Please list and send enclosed any relevant documentation you estimate useful

- [...]
